---

I received the following email request:

{quote}

Scott Adcock

Searching for my dad - we owned a 1965 black on black 2+2 coupe as our family car in the late '60's to the early 70's. Car was sold in Denver, Co in the very early 80's. Was a tripower car originally, but had the four barrel on it when sold. Automatic car. VIN number 252375C103955. Would like to find it if possible.

Thanks!

Scott

{end quote}

I have looked on the current Registry (there are 51 '65 coupes) and the last registration done by Larry Kosek in 1995 and can find no record of the car. If anyone knows of its whereabouts or history since sold in Denver, please let us know.

This is another example of why it is important to record the full VIN number - it would make tracking these cars much easier.
