I have my original fenders yet but wondering if there's any out there in better shape than what I currently have. If you have one or both send me a message and let me know what you'd like for them or it. Had one guy offer me a pair for \$5k. I passed.

They're only NOS once. If you're buying them to use and not as museum pieces, once mounted on the car all the extra perceived value of being NOS disappears in an expensive puff of smoke. Buy used.
