

2 Door Window Channel

Posted by hdcolo - 2017/11/18 17:19

. . Good Morning, , Working on the power window on my '66 Parisienne Convertible. . Had to replace a roller. . While I was there I replaced the front channel sash. . I want to replace the rear channel sash but can't find anything for it. . Can't even find the channel itself. . Looked in Ames and OPG and neither have anything for it. . On the one I have now, the center of the sash is totally gone the entire length. . Makes it real hard to adjust the glass so it goes up and down smoothly. .

. . Anyone know where to get one? ?

. .

. . Why isn't the photo of the channel I uploaded showing up? ?

:dry:

Email a photo to me at jgand789@hotmail.com

I'm looking at Ames catalogue (#P20, page 90) and I see several items that may be what you need:

PF550G

PF569

Have you tried calling them and asking for a tech?
