

1965 parts wanted

Posted by OldInjun - 2018/03/19 10:19

Jbatlle in CA is in need of some hlp with his recently acquired '65 2+2 convertible. I quote from his email:

A little help for my newly rebuilt 421/4BBL:

I am trying to set up my 4BBL carb's throttle linkage, springs and vacuums lines, etc.

I need a good or new trans kick-down switch (see above) and I thought someone might have a nice set of pictures of the carb both sides and the manifold area showing everything and how it lays out.

I need to set the cold idle also. Best way?

Still looking for:

Turn signal cancel plastic insert Non tilt

Nice clock to send out

Door edge guards

Rear tail panel not pitted or NOS

Under dash map light for convertible

Front ashtray not smoked in

Anyone who can help should contact Jim at:
