

Registry Map - New Feature!!!

Posted by OldInjun - 2019/11/14 14:17

If you've ever wondered where the registered 2+2's are distributed around the globe, I have the answer right here:

2+2's Around the World

To the extent that members have given me an accurate postal code, every car is represented on this map. A future enhancement will add the model year and body style to the location information. If you think you may need to add your zip/postal code to your registration, email it to pontiac2plus2registry@gmail.com and I will update it.

I hope you enjoy the map. Post your feedback here to let me know if features like this are of interest.
