

Website Outage

Posted by OldInjun - 2021/07/17 13:59

Apologies for the outage of several weeks, but I was involved in a hassle with the domain registrar - GoDaddy. Definitely not a vendor I would recommend. They didn't satisfy my issue, but at least I got the website back online.

I just drove back from the very successful POCI 2021 Convention yesterday, so once settled in I will have more news on the website and other issues.
