

'66 PIN STRIPE

Posted by 8lug - 2011/04/27 18:32

Where is the pinstripe supposed to be on a '66 coupe. I can find listings in sales lit. that says they are standard, but I can't find a photo or drawing that shows one. thanks, Mike

The artist renderings in the sales booklet as well as the official photo for the '66 2+2 all show the pinstripe just above the stainless trim along the low side of the body. They also show the end points. Hope this helps

Here's a picture of registry member Gary Kittle's beautiful '66 2+2 on the floor at POCI Charleston 2010. Gary researched the stripe position well, so I think it is correct as seen here:
