Car Photo Upload
Posted by Don - 2010/06/10 12:55

_____

The ability to upload new images via the Car Photo tab in "Edit Profile" has temporarily been lost. (Any photos already uploaded are still there, and safe.)

This problem is being worked on, and should be resolved within the next day or so.

Thanks!

_____

Don is still working on the photo upload issue, but in the meantime, there is a work-around. Instead of clicking "Edit Profile", click on your user name under "Members Online" on the Home Page (of course, you must be logged in). Click on the "Car Photos" tab, then "Submit New Gallery Entry".
Soon we will be able to do this through the "Edit Profile" option, but this works for now.
I am hoping for 1,000 new photo's from you guys over the weekend!

_____

Here is the new procedure for adding photos of your car to your profile ...

1. After you login, you'll see a new menu item under the 'Members' menu: View Profile
2. Select it, then click the Car Photos tab
3. Click Submit New Gallery Entry to upload your photo(s)

Please note that Edit Profile is still used to add or correct all other information in your profile.

Thanks!

_____

How big is the file (photo) you are trying to upload?
