

1965 4-SPEED H.O. HARDTOP ON E-BAY. NO MOTOR, GOLD

Posted by Dragartim - 2011/09/21 13:10

THIS IS TEXT FROM SELLER'S AD:

This is a 1965 Pontiac Catalina 2+2 Tri Power HO 376 HP 4 speed car, This is a very rare car, the ENGINE IS GONE, but I have the 4 speed transmission that has been rebuilt, bell housing and throw out fork, I have the PHS documents authenticate the car. The car has Transistor ignition, I have the distributor, module, wire harness and tachometer. The car also has the gauge package, light package, 8 lug wheels and posi rear end. The car has a badly rusted out trunk, 2 spots of rust below rear window, you know the area were it all starts to rust, under the vinyl top, drivers rear behind rear wheel. And a little bit at the base of the front window. I am hoping to sell complete but have considered parting out, but this could be a very special car for someone. Please ask questions. **CAR IS GOLD WITH PARCHMENT. WAS VINYL TOP. GLAD HE RECEIVED BIDS & DECIDED NOT TO PART IT OUT. :)
