

Speedometer for sale

I was all set to hit the "Buy-it-now" on this Ebay sale because it seemed like a bargain:

Went to the garage & dug out the "rally gauge" speedometer I've been meaning to install in my car - it didn't match. I think the one on Ebay is actually from a 1964. Can any of you '64 owners confirm my guess?

Looks like my '66 ,but, I'm not sure off the top of my head what a '64 looks like.

The lens is shaped slightly differently on the 65/66 than on the one for sale, but the bigger difference is the gauges. The one on Ebay has a gas gauge & ammeter - these are in the center pods on a 65/66 dash. The 65/66 "rally gauge" speedo has water temp & oil pressure gauges on the speedo instead of idiot lights.

In response to my email the seller took the sale item down, pending determination of the correct year.
