

## Type A fluid

Posted by pttoby - 2012/11/17 08:34

---

I am having trouble finding type A fluid for my transmission. Any substitutes????

Thanks

Toby

Below is an answer from a fellow member of the Delmarva Chapter POCl, who owns two transmission shops:

"Dexron replaced type A in late 60's. Ford went to type f. If its for a trans you can use Dexron 3/4 or multi blend dex/mercon. Now I heard Walmart sometimes has it and NAPA. Type a. If its a dynaflo it will not know the difference."

Hope this helps.
